

Castaic Lake

FISHING REPORT

WEEK ENDING 01/21/2012

Upper lake WATER TEMP: Mid 50's

Lower Lagoon WATER TEMP: Low 50's

The Department of Fish and Game will be stocking Upper Castaic Lake the week of Jan 30th 2012!

The Lake was stocked this week at the Main ramp on Wednesday the 18th with 1000 pounds. The trout can be caught on power bait and small Kastmasters and Rooster tails at the Main Ramp and off the dam. Those who are fishing with lures tend to get their limits a little faster than those using power bait. The striper fishing has still been really slow the past week for those fishermen using cut bait. Although the cat fish have been better all week on the cut bait most were caught close to the bottom. Even though the striper have been slow on bait they are picking up on the swimbaits, most have been caught along the dam and the banks of the west ramp. Lunker Punkers and Bombers are best used for the early morning and late evening bite while the Huddleston's and Castaic Swimbaits are great baits to be working during the day off the bottom. These swimbaits can also be used to catch the largemouth out on the lake from a boat or the shoreline. Not too many bass being reported being seen on the surface, most are being metered around 25 to 40 feet still so the Huddleston's and Castaic Swimbaits are perfect for that. The lower lagoon has been a hot spot for good sized largemouth. Early morning and evening the bass are still hitting Spooks and other top water baits. During the day though they have been biting big plastics, little blue gill imitation baits, and football head jigs around the fishing pier and Campsite A. The cat fish have also been biting chicken liver and bloodworms around the RV Campsites and Campsite B.

WHOPPER OF THE WEEK!

SORRY STILL NO WHOPPERS TO REPORT THIS WEEK!
